HALLMARKS OF AN NP STUDENT

PASSIONATE LEARNER LEARNING FOR LIFE
Our students are self-directed, exploring learning beyond the classroom. They are enterprising and innovative, pursuing interests and initiating projects.

BIG-HEARTED PERSON SERVING BEYOND SELF
Our students have a strong sense of civic responsibility. They contribute generously, making a difference in the community.

GLOBAL SMART PROFESSIONAL EMBRACING CHANGE
Our students have relevant skills and knowledge, and are exposed to cross-cultural and intergenerational environments. They are agile and adaptable, embracing change.
Set up in 1963 by the Ngee Ann Kongsi as Ngee Ann College with only 116 students, Ngee Ann Polytechnic (NP) has come a long way from its humble beginnings to establish itself as one of the leading institutions of higher learning in Singapore. Its vision is to prepare graduates with a passion for learning, values for life and competencies to thrive in a global workplace.

Today, the polytechnic offers 44 full-time diplomas and three Common Entry Programmes through the following academic schools:

- School of Business & Accountancy
- School of Design & Environment
- School of Engineering
- School of Film & Media Studies
- School of Health Sciences
- School of Humanities & Social Sciences
- School of InfoComm Technology
- School of Interdisciplinary Studies
- School of Life Sciences & Chemical Technology

While NP continues to provide pre-employment training, it is also looking to strengthen its role in the continuing education and training (CET) arena. Through its CET Academy, NP currently offers a wide variety of training programmes and courses for adult learners. It delivers about 10,000 training places and conducts over 200 courses every year, ranging from formal diploma programmes to customised short-term courses. NP’s CET courses aim to help working adults future-proof their careers through reskilling and upskilling, while providing a pipeline of talent for emerging and growth industries. In line with its efforts to drive lifelong learning, NP has set its sights on becoming a polytechnic for all ages.

The Ngee Ann Experience

Against the backdrop of a volatile and globalised world, NP aims to develop multiple peaks of excellence among its students, inspire learning beyond the classroom and transform itself into a future-ready campus. To this end, NP has developed an edge in nurturing entrepreneurship through its many signature programmes. In addition, it takes pride in instilling a sense of purposeful learning and active citizenry among its students by introducing a service-learning pedagogy in its core curriculum.

At NP, learning takes place amid a caring, conducive and smart environment with top-notch facilities ranging from broadcast, multimedia and animation studios to research laboratories as well as simulation and technology centres.

Leveraging its close links with industry players, start-ups, and research and community partners, NP enriches students’ learning journeys through internships, collaborative projects and off-campus learning opportunities at partners’ premises.

Through all these initiatives, NP aspires to develop students who are passionate about learning, big-hearted and global savvy, equipped for success in the future economy.

There are currently over 14,000 full-time students in NP. With the graduating cohort of 2019, the polytechnic has an alumni community of more than 170,000.
We will always welcome you back to upskill and reskill with us, and support you in your learning needs all through your work life. As a poly for all ages, we have also ramped up our course offerings at our CET Academy. There is something for everyone, be it a SkillsFuture Earn and Learn Programme, a post-diploma certificate or a short course on emerging skills. I hope you will seize every opportunity to learn and add value to your profession.

As you pursue your dreams, remember to be grateful to those who have supported you in your journey. Be the change you want to see. Live life passionately and make a difference in your community.

Let me leave you with this quote, which I hope will inspire you to chart your own path:

“Do not follow where the path may lead. Go, instead, where there is no path and leave a trail.”

I wish you all the best in your future endeavours and look forward to hearing your future stories.

Principal, Ngee Ann Polytechnic

At the same time, I hope they have also developed in you a passion for learning, a big heart for others and a global-smart mindset – all important traits that will help you thrive in today’s volatile and disruptive economy.

It is no secret that the diploma and skills you have today are not going to last you a lifetime. To stay on top of change, you must build on the foundation you have received at NP and embrace lifelong learning to continuously deepen your skill sets.

FROM THE PRINCIPAL

Dear Graduate,

Congratulations on graduating from Ngee Ann Polytechnic!

You have come a long way to achieve this significant milestone. I hope that your journey at NP has been an enriching and a rewarding one. Whether you have participated in a meaningful service-learning project, an insightful internship, or benefited from the guidance of your lecturers and mentors, these experiences have shaped you for the better and given you a head start in your chosen paths.

At the same time, I hope they have also developed in you a passion for learning, a big heart for others and a global-smart mindset – all important traits that will help you thrive in today’s volatile and disruptive economy.

It is no secret that the diploma and skills you have today are not going to last you a lifetime. To stay on top of change, you must build on the foundation you have received at NP and embrace lifelong learning to continuously deepen your skill sets.
When others see a problem, Lucas Leong sees an opportunity – an occasion to create. And he hopes to apply his engineering knowledge to develop solutions that will make lives safer, more enjoyable and productive.

But the Engineering Science student was not always certain about his calling. Lucas chose the course at Ngee Ann Polytechnic because he excelled in math and science in secondary school. He soon discovered that it was not enough to just excel in those subjects and struggled to connect theory to practice.

“I found it difficult to see the applications and purpose of engineering, so I lost interest in learning about new technologies or engineering concepts. I was very discouraged and thought I had chosen the wrong course,” said Lucas.

His focus changed, however, after participating in the 12-day Social Leadership Challenge (SLC) trip to Taiwan last year. Besides learning how various voluntary welfare organisations in Taiwan address social issues related to the environment, healthcare and crime, he also got a deeper understanding of the challenges faced by people with disabilities. He even spent a day on a wheelchair, just to experience what life is like for those who are physically challenged.

The experience opened his eyes to the far-reaching effects of engineering and the roles that engineers play in envisioning a world that could be.

“I saw how engineering is so pervasive in our society. There are so many things that we often take for granted. A ramp or a playground, for example, has to be carefully designed for the physically challenged,” shared Lucas, who found a renewed appreciation for his course after the trip.

It also made him more determined to pursue a career with purpose and to create engineering solutions that would make an impact in the lives of others. Lucas also started volunteering at different organisations to reach out to seniors, youths-at-risk and persons with disabilities.

“I started thinking about how I can put my engineering knowledge to good use. Volunteering helps me to understand the needs of others, so I can create solutions that are practical,” said Lucas.

In more ways than one, the trip also helped to demolish the inferiority complex he had sometimes felt, especially when it came to group project discussions.

“I've always thought that my ideas were not good enough, but my friends helped me realise that everyone has their own strengths and weaknesses, and we can compensate and complement each other,” explained Lucas, who had to work with his peers to design a programme to engage troubled youths, as part of the SLC.

Instead of comparing his successes with others, Lucas now believes in tapping on his own strengths to make a difference in the community. Lucas will be pursuing an undergraduate degree programme at the Singapore University of Technology and Design (SUTD), under the prestigious SUTD Global Distinguished Scholarship.

The Ngee Ann Kongsi Gold Medal is awarded each year to the most outstanding graduate from Ngee Ann Polytechnic. The recipient is selected from the top graduates of the various Academic Schools. The medal, first presented in 1980, is funded by Ngee Ann Kongsi, a foundation that is actively involved in educational, cultural and welfare activities in Singapore.

The Lee Kuan Yew Award was first presented in 1992. It is awarded to the most outstanding graduate from a technology course in Ngee Ann Polytechnic. The award is funded by the late Mr Lee Kuan Yew, Singapore’s first Prime Minister. Mr Lee had donated the honorarium that he had received from various overseas speaking engagements and from the funds raised from a special edition of his memoirs.
A bout of depression and spate of illnesses set off a chain of events that altered Tiffany Wong’s direction.

The former Integrated Programme student was only 15 years old when she was hit with multiple ailments that led her to think more deeply about her purpose in life.

“I just kept falling sick and life felt bleak. When I couldn’t attend classes, it felt like a big part of me was taken away. At that point, I started thinking that there must be more to life than just studying,” recounted Tiffany, who used to study at National Junior College.

During that time, Tiffany carefully considered her pathways and gained a stronger sense of self-awareness. One thing was clear to her – she wanted to pursue a meaningful job that would give her a sense of fulfilment. Nursing as a career stood out for Tiffany, because she wanted to “make a positive difference in the lives of those struggling with health issues”.

She said: “I realised how important it was to live healthily. Being sick for a long period also helped me to understand and connect with the emotions and experiences of people who are ill.”

Tiffany took a leap of faith and applied for the Health Sciences (Nursing) course at Ngee Ann Polytechnic (NP), and has been using her skills to help people get back on their feet ever since.

As part of her course, Tiffany was attached to various local hospitals, with each stint lasting two weeks to three months. There, she gained hands-on experience while working in different wards, including those that specialised in surgical, urological and geriatric medicine. She completed an overseas internship at Apollo Hospital in Chennai, India, where she was inspired by the nurses’ resourcefulness, passion and heart, despite their lack of sophisticated equipment.

Describing the stints as eye-opening, Tiffany is grateful that she was also exposed to a wide range of cases. Through interactions with the patients and working closely with the nurses, she picked up practical skills as well as valuable soft skills, such as attentive listening and observation for non-verbal cues.

“When I noticed a patient was more withdrawn than usual and felt something was up,” said Tiffany.

“Sometimes, it’s what the patient doesn’t say that is more powerful. During one of my hospital attachments, I noticed a patient was more withdrawn than usual and felt something was up,” said Tiffany.

“It turned out that he felt fearful about his hospital stay and had no one to talk to, so I took the time to reassure him. He teared up and started to share what was on his mind.”

That is why Tiffany is always willing to invest her time and put her heart into caring for her patients, and believes her love for people will stand her in good stead.

“The rapport and trust I get to build with my patients and their family is precious. I want the patients to know that they can have an avenue to express themselves, and know that they are heard and not forgotten.”

Long before he enrolled into the Pharmacy Science course at Ngee Ann Polytechnic (NP), Ang Wei Jie was already “researching” on medications and drugs when he had to help his ailing dad sort out the doctor’s prescriptions.

“My father would ask me about the medications and the appropriate dosage. I had to call the doctor or Google most of the drug names because I didn’t know what they were,” said Wei Jie, whose interest in pharmacy was sparked as a result.

“I was fascinated by the science behind the drugs and how something as tiny as a pill can affect the human body in different ways,” added Wei Jie. His passion was further deepened after spending many an afternoon watching documentaries on the human anatomy and physiology.

During his time at NP, Wei Jie had the opportunity to complete an internship at the Pharmacy Department of the National University Hospital, where he assisted pharmacists to prepare and dispense medications for patients.

Those hands-on experiences helped him to gain a deeper appreciation of the inner workings of the pharmaceutical industry and also pick up valuable practical skills interacting with patients.

“I was able to apply the knowledge learnt in the classroom to real scenarios. It also affirmed my interest in the area of pharmacy and motivated me to strive harder.”

For Wei Jie, being able to help patients understand their medication better is meaningful work. He said: “It’s very rewarding knowing that I can play a role in a patient’s journey towards recovery.”

Wei Jie’s passion for helping others is not just limited to the classroom.

Outside of school, Wei Jie is a Cadet Inspector at the National Police Cadet Corps, where he mentors and trains junior cadets every week. He also headed the Community Service interest group at NP, where he helped to plan various events for the less fortunate. He believes that volunteerism helps him to discover more about himself, build character and grow as a person.

“Through volunteering my time and effort, I get to learn more about different perspectives from people of all walks of life. This, in turn, helps me know myself better,” shared Wei Jie.

School used to be an afterthought for Oh Jia Jia. As a primary school student, she mixed with bad company and often skipped classes. The Psychology Studies graduate admitted spending more time hanging out in Internet cafes than on her books. But doing badly in her Primary School Leaving Examination was a wake-up call for her.

“There was a lot of disappointment. I felt so lost and I wanted to do better in secondary school,” she said.

Thankfully, good mentors and encouraging teachers changed her life by rescuing her from the wilderness.

“They encouraged me to never give up. I was so grateful to have people who believed in me and gave me the extra lift when I needed it,” Jia Jia added.

While Jia Jia’s hard work paid off and she did well enough to switch from the Normal (Academic) stream to the Express stream, she struggled with the faster learning pace. To make matters worse, her mother also fell ill and the hospital bills took a toll on the family’s finances. During this period, social workers also stepped in to provide assistance to her family.

“It was tough but I continued to soldier on because of the help I’ve received from my teachers and social workers. People have invested in me, and I hope to pay it forward by helping others,” said Jia Jia.

She has set her mind on social work as a career, a resolve made firmer after her internship experience at Beyond Social Services. Besides liaising with volunteers and shadowing social workers on house visits, Jia Jia also reached out to youths at risk. She finds it most satisfying to be able to help them change for the better.

She is now on a mission to empower other youth to maximise their capabilities, by first becoming a friend to them.

“There is no job like social work that allows you to build relationships with people to effect a change,” said Jia Jia, who recalls persuading two delinquent teenagers to return to school.

“I saw myself in them. I used to be just like them, until someone came along and looked beyond my behavioural issues. The fact that someone cared for them motivated them to turn over a new leaf,” shared Jia Jia.

“This has shaped the way I view youths and children with behavioural issues. Instead of judging or labelling people by their abilities, I believe that they are capable individuals with strengths that they have not discovered yet.”

This led her to curate a developmental programme to help youths to identify their personal strengths for her Final-Year Project. Through a series of activities such as drama and outdoor learning journeys, she hopes to empower “problem kids” to build better relationships, and help others like themselves to reinvent their lives.

“I hope to see broken lives transformed just like mine, and for children and youth to grow up knowing that life is worth living, and to find meaning and purpose in everything that they do,” said Jia Jia.

The Lien Ying Chow Gold Medal is awarded to the most outstanding graduate from a non-technology course in Ngee Ann Polytechnic. First awarded in 1998, it is funded through the generous contribution of the late Dr Lien Ying Chow, Chairman of the Lien Foundation. Dr Lien was the Chairman of the Board of Governors of the then Ngee Ann College from 1963 to 1965.

Lim Wei Cheng grew up wanting to follow in his father’s footsteps and pursue his interest in electronics.

His father, an electrician, was always the go-to person when appliances broke down at home.

“Watching my father fix problems so effortlessly all the time inspired my interest in the field,” said Wei Cheng, who added that he has always had a fascination with how things work.

He eventually chose to study the Diploma in Electronic & Computer Engineering at Ngee Ann Polytechnic (NP), where he relished every opportunity to deepen his skills and improve himself.

The former ITE graduate counts his internship stint at EINST Technology as one of the highlights of his polytechnic life. Tasked with the development of a software that can detect fruit ripeness, Wei Cheng took it upon himself to pick up new programming languages to complete the project successfully.

“It was challenging as I had to quickly integrate large amounts of information and put them together. But completing the task helped to build up my knowledge and confidence,” shared Wei Cheng.

Describing his three years at NP as a rewarding journey of self-discovery, Wei Cheng believes that he is a better person today, thanks to the support of his family and teachers.

“Growing up in a single parent family, I’ve always felt inferior to others and didn’t have many friends in school. I also found it very difficult to cope with my studies when I first joined NP,” explained Wei Cheng.

“But my family and lecturers never gave up on me and encouraged me to press on. Their unwavering support has inspired me to also pay it forward.”

An active member of the Rotaract Club and School of Engineering Rangers, Wei Cheng is also a grassroots leader and the assistant secretary of the youth executive committee at the Toa Payoh East Community Club. He is especially passionate about working with the elderly and plans to start projects to help them bridge the digital divide.

“Volunteering has taught me many valuable lessons. A simple gesture can light up someone’s day. No matter how difficult my life is, I can always choose to be grateful for what I have and put others before myself.”

The Tay Eng Soon Gold Medal is awarded each year to the most outstanding Ngee Ann Polytechnic graduate who is formerly from an Institute of Technical Education. First awarded in 1994, the medal is funded by the Tay Eng Soon Scholarship Fund, set up in honour and memory of the late Senior Minister of State for Education, Dr Taylor Eng Soon.
While he knew by touch that the man had already passed away, he did his duty as a trained lifesaver and commenced cardiopulmonary resuscitation (CPR) until the paramedics arrived. Although Meng Kiat was unable to save a life that day, the deceased’s son thanked him for his efforts.

Reflecting on the incident which gave him a sense of purpose, he said, “If there is something that needs to be done for a life at stake, I will do it.”

Meng Kiat’s roles as Student Advisor and President of the Lionhearters have also sharpened his leadership skills and trained him to think on his feet. Thankful for the fulfilling three years he had at NP, Meng Kiat said, “As a Ngee Ann student, I have matured and become more courageous. I hope to be able to continue to save lives and play my part for society.”

When Aw Bingwen unexpectedly received a D7 for his ‘O’ level English, the first thought that came to his mind was his mother’s feelings.

“Even when my family could not afford to put food on the table, my mother would set aside money for my English tuition at some of the best tuition centres around,” said Bingwen who was well aware of his family’s financial challenges. The sacrifices his mother had made to ensure he would do well for his O levels thus weighed heavy in his heart.

“I was worried that she would give up on me. I was afraid that I’d disappointed her, and she might punish me for letting her down,” he added.

But Bingwen soon realised that his fears were unfounded. Instead of reacting in the way he had imagined, his mother reassured him of her support and encouraged him to choose a course which he liked. His mother’s unwavering support and belief in him was a turning point for Bingwen; he told himself that he would strive harder in his studies.

Things seemed to have gone quite well for him after that – he got into the Diploma in Chemical & Biomolecular Engineering (CBE) course at Ngee Ann Polytechnic. It was a course he was very much attracted to as it leveraged his strengths in Math and Science. He was also optimistic of his career prospects in that field.

However, life dealt him a blow during his second year – his mother fell ill. It was during that period that he realised how important his family meant to him.

“It has dawned on me that all my achievements would be meaningless if my family members are not around to celebrate with me. Nothing is better than going home to family and appreciating the company of each other,” he said.

Tough times build strong character - Bingwen can attest to that. His resilience has seen him through his NP days. His efforts have paid off as he has secured a place to study Chemical Engineering at the National University of Singapore (NUS), along with an NUS Merit Scholarship. His humble background, coupled with his gratitude for the support his family had received from the community, has also strengthened his resolve to pay it forward. As a member of NP’s FoodAid Club, he volunteered in distributing food to the elderly and teaching them about nutrition.

“This is my way of saying thanks to those who had helped my family through the tough times,” he said.

“It’s important to think like hackers, so that you can identify weaknesses and develop stronger defences,” said Xin Ru. The self-confessed techie is always on the lookout for new technologies or knowledge that can sharpen her skill sets. Xin Ru joined the pilot run of Empower, a programme that aims to equip young women with skills in the emerging field of artificial intelligence (AI). She hopes to apply AI concepts in the information security sector in future.

“As technology continues to evolve, it’s important to stay on top of trends. I joined the programme to get more exposure to new concepts.”

Outside of the classroom, Xin Ru is the president of the InfoComm Technology Society and an active student peer helper. Besides organising community service events to help the needy, she also takes time to offer a listening ear to her peers. Despite having to juggle her work commitments, she is grateful for these opportunities to serve others as they have taught her several life lessons.

“I’ve learnt to be more empathetic and sensitive to the needs of others. I also like to think that the exposure to alternative perspectives on things has enriched my thinking and made me a more open and compassionate person.”

Xin Ru hopes to pursue an Information Security degree at the National University of Singapore after graduation.

Enrolling in the Mass Communication course in Ngee Ann Polytechnic (NP) was a natural choice for Le Hai Son. After all, as an extrovert, Hai Son enjoys interacting with people, and has a natural flair for languages and photography. It proved to be the right decision as he did relatively well in school, except for one module – Speech Communication. Hai Son often found himself stumped for words whenever he had to deliver a presentation.

Hoping to overcome his fear of public speaking, Hai Son joined the Toastmasters Club at NP. The countless public speaking opportunities helped him to cope with his stage fright.

“I have grown to be a more confident person and speaker. It also showed me that anything is possible if I put my mind to it,” said Hai Son.

Determined to make the most of his experience at NP, Hai Son constantly pushed his limits and joined several co-curricular activities (CCAs), including the Photography Club and Film & Media Studies Society.

“Although it was challenging having to juggle several CCAs and my school work at the same time, I learnt the importance of prioritising my work. It was definitely a time of personal growth for me,” shared Hai Son.

He even made his first foray into the world of business during his second year. He is grateful for the Entrepreneurship Programme, which offers students the flexibility to develop their business ideas as part of their curriculum, for giving him the extra push he needed.

“I have always wanted to start a business, but the programme gave me a head start. I was also paired with a mentor who provided guidance and valuable insights into business development. That was very helpful for startup owners like me,” shared Hai Son, who started an online business selling laptop stickers.

Hai Son also participated in the Overseas Merit Fellowship to Manila, Philippines. The trip broadened his perspectives, as he got a closer look at the developments in the country.

“It was an eye-opening experience that started me thinking about what I can do to contribute to society. I became more aware of the opportunities available in the region and was more inspired to become a global citizen,” he said.

Looking ahead, Hai Son hopes to start a social enterprise in Vietnam.

“I hope to help farmers in Vietnam produce high value crops, create job opportunities in the area, and give children living in rural areas an education and a chance to go further in their lives,” said Hai Son, a Vietnamese who has been living in Singapore for more than a decade.

Gigi Tuang is not one to live life in the slow lane. The ever curious Network Systems & Security graduate enjoys being kept on her toes and loves a good challenge. So when she was tasked to develop an automation robot during her internship stint at the Ministry of Home Affairs (MHA), Gigi took it upon herself to pick up programming languages despite not having any prior knowledge.

The self-directed learner started scouring the Internet and books to learn the essentials of coding and created her first robot in just one week. The robot was instrumental in automating mundane administrative tasks and improving work productivity at the ministry. For example, tasks that used to take a staff member three minutes can now be completed in a matter of seconds.

Her achievements did not come without hard work.

“It was challenging and I had to go through a lot of trial and error. But it was satisfying to finally get the programme to work. I was glad to be able to apply my skills and contribute in whatever way I could,” she said.

In fact, MHA was so happy with Gigi’s work performance that they asked her to develop more robots.

And so she did. Gigi eventually created nine robots that are still being deployed in the various departments of the Ministry. She also trained the staff how to use the platforms that she had created.

“Coding has developed my resilience and sharpened my critical thinking skills. I had to learn how to approach challenges from different perspectives to identify the best possible solutions,” shared Gigi, who counts her internship experience as the highlight of her three years at Ngee Ann Polytechnic (NP).

When she is not behind the computer screen, you will find Gigi honing her martial arts skills or shooting hoops. Besides heading NP’s netball team, Gigi is also an active member of the School of Engineering Society and Network Systems & Security Academic Club.

She also believes in serving the community and was involved in NP’s Youth Expedition Programme to Yunnan for three consecutive years. Seeing how her contributions had helped the locals after her first visit, Gigi realised she could do more. That led her to step up to the plate to serve as a group leader on her subsequent trips.

“I was glad to see that the villagers’ standard of living had improved, as a result of our suggestions. It showed me that we can all play a part to make someone’s life better,” she said.

Gigi hopes to become a pilot in the Singapore Armed Forces after completing a computer science degree in university.

Now that you have completed your education at Ngee Ann Polytechnic, we hope you will keep in touch with one another by joining our alumni community.

For starters, do visit the alumni website at http://www.np.edu.sg/alumni/ to keep track with what’s happening in campus, check out our newsletter, alumni newsmakers and update your profile.

You can look forward to receiving the exclusive NP Alumni card which gives you privileges in the usage of Ngee Ann’s sports facilities on Sundays and Public Holidays.

As our graduate, you can apply for an alumni membership of the Lien Ying Chow Library at a special annual rate of $43.

In addition, you are eligible for a discount when you sign up for courses under our CET Academy. With its wide range of programmes, you are bound to find something suitable to upgrade your expertise.

We look forward to welcoming you back to our campus.

JOIN THE NP ALUMNI COMMUNITY

Ngee Ann Polytechnic (NP) is happy to continue supporting you in your learning journey, through its CET Academy.

Whether you want to beat the competition by deepening your skills, enjoy greater flexibility in your learning or simply learn for free, NP’s CET Academy offers myriad options.

For starters, you might be keen to take advantage of the SkillsFuture Earn & Learn Programme (ELP). This structured work-study scheme is designed for fresh polytechnic graduates like you, to get a head-start in your career of choice. You do not have to pay fees for ELP courses and you get a $5,000* bonus upon completing the course.

Depending on your diploma, you can opt for one of the following NP SkillsFuture ELP courses:

- Advanced Diploma in Accountancy
- Advanced Diploma in Early Childhood Intervention (Special Needs)
- Certificate in Entrepreneurship (Startup Talent Factory)
- Diploma in Business Practice (Administration & Management)
- Specialist Diploma in Analytical Science
- Specialist Diploma in Community Gerontology Nursing
- Specialist Diploma in Consumer Banking
- Specialist Diploma in Digital Branding & Social Media Strategies
- Specialist Diploma in Electrical Design & Operations
