

**Other Publications:**

- The promoting effect of byproducts from *Irpex lacteus* on subsequent enzymatic hydrolysis of bio-pretreated cornstalks. *Biotechnology for Biofuels*. 2011.
- Fungal treatment of cornstalks enhances the delignification and xylan loss during mild alkaline pretreatment and enzymatic digestibility of glucan. *Bioresource technology*. 2010.
- Evaluation of white-rot fungi-assisted alkaline/oxidative pretreatment of corn straw undergoing enzymatic hydrolysis by cellulose. *Journal of bioscience and bioengineering*. 2010.
- Enhanced saccharification and ethanolic fermentation of tobacco stalks by chemical pretreatment. *Journal of Biotechnology*. 2010.
